EDUCATION

Arizona State University

Bachelor of Science in Computer Science

Tempe, AZ

December 2027

- **GPA:** 3.56/4.0 | **Honors:** Kaplan International Scholar, Ira A. Fulton Schools of Engineering Dean's List (3 terms)

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, SQL, C/C++, C#, MATLAB

Machine Learning / AI: Generative AI, LLM, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, Multi-Agent Systems, Vector Stores, Flowise, Web Scraping, TensorFlow/Keras, Computer Vision, Supervised Learning, CNN

Backend Technologies: Spring Boot, Spring Data JPA, Hibernate ORM, RESTful APIs, Redis, SQL, Node.js, Socket.IO

Frontend Technologies: Next.js, Vue.js, Nuxt.js, React, HTML/CSS

Security: JWT, Rate Limiting, Authentication, Input Validation

Development Tools: Git, Docker, AWS, OCI, Kubernetes, Oracle BRM, Power BI, IntelliJ, VS Code

PROFESSIONAL EXPERIENCE

Congero Technology Group

Reston, VA

Software Engineer Intern

June 2026 – July 2026

- Configured **Oracle BRM** and **Embrix** catalogs in **Pricing Center** (flat-rate, pay-as-you-go, token-limit plans for NextAI/Oddisey).
- Built billing test accounts and mapped usage events to **RUMs** for rating, invoicing, and customer-care workflows.
- Deployed cloud-native BRM on **OCI (OKE/Kubernetes)** and built a **Power BI** billing dashboard; completed **AWS Cloud Practitioner** training.

MightyID

Irvine, CA

Software Developer Intern

May 2025 – August 2025

- Improved educational content efficiency resulting in **25%** enhanced user engagement by optimizing **Nuxt.js** and **Grape JS** dashboard.
- Collaborated with cross-functional teams to implement responsive, accessible, and user-friendly interface components tailored for the platform's user base.

RoboMain

Oshawa, ON

Software Developer Intern

May 2024 – December 2024

- Constructed a **CMMS (Computerized Maintenance Management System)** that centralized and simplified maintenance operations for onsite teams and management
- Engineered core modules for a CMMS using **Next.js**, **TypeScript**, **Java Spring Boot**, and **DBeaver SQL**, enhancing development velocity across a cross-functional team, and accelerating feature deployment by 20%
- Identified and resolved bugs, **reduced reported issues from testers by 30%**

FPT Corporation

Ho Chi Minh City, Vietnam

Software Developer Intern

May 2023 – August 2023

- Engineered a high-performance shortening link system using **HTML**, **CSS** and **Nuxt.js**, empowering end-users to efficiently generate shortened links.
- Implemented a consistent back end with **Java Spring Boot**, and employed the **Asynchronous Request-Reply** pattern resulting in **50% decrease in API response speed** and smoothen user experience

PROJECT EXPERIENCE

Sequential QA Bot

June 2025 - July 2025

- Created a sequential QA bot system with **RAG** architecture to store and retrieve restaurant information, enabling intelligent routing between **vector store** knowledge base and web search for comprehensive customer support.
- Integrated **multi-agent sequential** workflow using **LangChain** framework with conditional routing, **LLM** nodes, **tool integration**, and **hallucination detection** through relevance grading to ensure accurate responses for restaurant queries.

Personal Portfolio

March 2025 – July 2025

- Developed a modern, responsive portfolio website using **Next.js**, **TypeScript**, and **Tailwind CSS**, featuring **server-side rendering** for optimal performance and SEO
- Implemented dynamic content management with **MDX**, showcasing projects, skills, and experience with smooth animations using **Framer Motion**
- Integrated contact form with email functionality and optimized site performance with **server-side rendering** and **static generation**

Book Store

December 2023 – January 2024

- Developed a production-ready API supporting 1,000+ concurrent users with 98% uptime using **Dockerized microservices**.
- Reduced API response times by 70% and query latency by 60% through strategic **indexing**, **Redis/Caffeine caching**, and **asynchronous processing**.
- Architected a robust security strategy featuring **JWT** authentication, **rate limiting**, and secure data validation pipelines to mitigate vulnerabilities.
